

Product Testing Data Sheet

The Product Tested: **BIO-CID Multipurpose Cleaner**

The Testing Company: **Pizzolotto S.P.A.**

The Cleaning Tests Pizzolotto S.P.A. Conducted

1. **Ceramic Surfaces:** The product was diluted at 1% and used to clean a ceramic tiled floor. The floor was dirtied with oil, black smoke, extra-fine sand left to dry and then cleaned with the bio-cid solution at 1% in water. A bucket of 5lt of water was used. Half the floor was washed down with water whilst the remaining half was left to dry without rinsing. No differences were noticed between the sections of floor. The floor proved to be perfectly clean and shining.
2. **Marble and granite Surfaces:** Another test was carried out in the bathroom washing a marble and granite surface. The surface was first dirtied with a mixture of oil, calcium carbonate and soap. It was washed with a solution of bio-cid at 1% in water. The result was excellent without rinsing.
3. **Stainless Steel Surfaces:** The 3rd test was carried out on a stainless steel surface in the kitchen. The surface was first dirtied with oil, coffee, wine butter and tomato sauce. After the surface dried, it was washed with a solution of 1% of bio-cid in water, without rinsing. The surface proved to be well cleaned, shining and without marks.

The Conclusions Pizzolotto S.P.A. Made

These results are very good therefore we can conclude that this product BIO-CID could also be used to wash dishes, pans, cutlery and glasses both in the dishwasher and by hand with excellent results.
